

## Minutes

### Video Meeting 19.05.2020

#### 1. Current situation in schools

England: school is closed, some teachers are working with some children (risk families)  
Romania / Bulgaria: schools are completely closed until September  
Germany: pupils are coming to school round about once a week in small groups (rotation system)

#### 2. Extension of project time

- Extension is generally possible (Germany 3 to 6 months; exceptions for more are possible)
- Latest application for extension: one month before the project is ending
- We agree that we need extension but are going to decide about the application for it when we have got a better overview about the situation

#### 3. Work on project in Corona times

- The “All together”-song/film activity (Beatles song) we decided to do last February is not possible to implement during the current situation. We stop it and will keep the idea for later.
- Each school describes school’s activities concerning holding and strengthening relationships between school and families on the blog (at least one post).
- Each school uploads posts about school’s local activities on the blog. (Can be short texts and just a few photos “How is school alive during these times?”)
- Marija sends the link for the puzzle collage again to all schools. If pupils are doing the jigsaw it would be nice to get photos for the “A colourful impression for playing”-post on the blog (upload and tell Annette to put it in 😊).

3a) New activity “A paper plane’s journey around Europe”: Schools will give each other creative tasks / challenges which will be fulfilled by pupils/parents/teachers. One school sends the tasks via paper plane symbolically to the next school. People will take photos while fulfilling the task and while sending the plane to the next school. A film out of the photos will develop. Order: 1. England, 2. Romania, 3. Germany (Heinrich-Böll-Schule), 4. Bulgaria, 5. Germany (Janusz-Korczak-Schule), 6. England

A colleague from England will create the film. It will be uploaded on the blog.

There is no exact time frame for this activity because everything is going slowly in the moment. Each school will take as much time as necessary.

#### 4. E-Twinning

- Work on the Twin-Space is not satisfying up to now.
- The group decided to try it again because all participants use E-Twinning for finding partners and new projects and they want to support the idea of an independent European platform for teachers.

- Some explanations how to transfer files from the material-store to the page structure were given.

## 5. Other

- Participants decided to keep the order of mobility hosts: Next mobility is going to England. The group will speak about that mobility when the travelling situation is clearer. (We all hope to see each other in November 😊).
- Participants decided to meet once a month via video meeting to keep the contact.
